## Management Discussion and Analysis Report

### Overview of the World Sugar Industry

Sugar is produced in more than 123 countries. Over 70% of the production is consumed domestically and the rest is being traded. Since only 30 % of the world sugar production is traded freely small changes in production and government policies tend to have large effect on world sugar markets

Raw Sugar and refined sugar are two different products traded internationally Beet sugar producing countries export refined sugar while cane sugar producing countries export either raw or refined sugar In recent years, the share of raw sugar in total sugar exports has been about 60 % The major sugar exporting countries are Brazil Thailand, Australia and Guatemala These countries account for 68% of global exports

The annual global sugar production is approximately 175 million MTs with about 30% of production exported from exporting countries The largest sugar producing region is Brazil followed by India and European Union

Global sugar production for 2015-16 was estimated at 172 million MTs down by 3 million MTs with decrease in Brazil India and EU Global sugar consumption for 2016-17 is estimated at around 174 million MTs exceeding production

Brazil the largest sugar producer and supplier will continue to play a key role on world markets but its dual use of sugarcane as feedstock for ethanol and for sugar production will continue to be affected by relative price competition between export-oriented market for sugar and the largely domestic ethanol market

### Indian Sugar Industry

India is the World's second largest producer of sugar The Annual sugar production is in the range of 25 - 28 million tonnes The Indian Sugar industry is amongst the few industries that have successfully contributed to the rural economy The industry is a source of livelihood for 50 million farmers and their families and provides direct and indirect employment to over 2 million people

The sugar season 2015-16 ended with a total sugar production of 25.1 million tonnes with an additional 9.1 million tonnes as opening stock The total availability during the season was 34.2 million tonnes out of which the total off-take was 26.5 millions tonnes including export of 1.65 million tonnes leaving behind almost 7.7 million tonnes of sugar for the current season 2016-17

### Sugarcane Price

The Fair and Remunerative Price (FRP) is fixed by the Central Government every year at the beginning of the sugar season which is the minimum price the sugar mills have to pay to the farmers. In addition to the above, some State Governments also announce State Advised Price (SAP). The prices of sugarcane announced by the Central/State Governments are very high compared to other major sugar producing countries in the world. Brazil, the largest sugar producing nation and other major sugar producing countries have linked the sugarcane prices in line with market sugar prices. There is an urgent need to rationalise the cane pricing policy to keep Indian sugar industry viable.

### Sugar Price

The prices of sugar witnessed a significant recovery during the second half of the financial year 2015-16. The prices are expected to be stable due to lower cane crush estimates and steady increase in consumption.
